

## Commonly Asked Questions About Dermal Fillers

---

### Types of dermal fillers

*Radiesse™, Restylane™, Juvéderm™*

*Everyone will notice, but no one will know. Look years younger without surgery.*

Impressions of beauty change with time - as do our faces as we age. With dermal fillers, you can enhance your natural beauty.

### Radiesse®

*Welcome back your own natural collagen with RADIESSE® wrinkle filler.*

When you make the choice to restore facial volume and rejuvenate your appearance, choose beautiful and natural results that last. RADIESSE wrinkle filler delivers immediate, natural-looking volume and stimulates your body to produce new collagen for a youthful appearance that is long-lasting. In many patients, RADIESSE wrinkle filler benefits may last a year or more without costly and time consuming touch-ups.

### How does Radiesse work?

The ideal way to achieve wrinkle reduction is by replenishing lost volume. With RADIESSE® wrinkle filler, you welcome back your own natural collagen to smooth out the signs of aging. That's because RADIESSE wrinkle filler's unique formulation stimulates collagenesis – the production of new collagen – which results in increased volume for natural looking wrinkle correction that may last a year or more in many patients. It's also why more and more cosmetic surgeons, estheticians, and other medical professionals are choosing RADIESSE wrinkle filler for long-lasting facial rejuvenation.

The RADIESSE wrinkle filler difference:

- Stimulates the body's own natural collagen production
- Instantly corrects wrinkles
- Results that may last a year or more in many patients
- Now FDA approved to enhance patient comfort<sup>1</sup> with lidocaine mixing

In just one syringe, many patients can achieve long-lasting youthful results. And now you can ask Zeal's RN about the RADIESSE treatment option that significantly improved comfort. Because treatment with RADIESSE wrinkle filler is simple, quick, comfortable and convenient, with immediately visible results that last, more and more people are discovering that it is the natural choice for maintaining a more youthful appearance.

In this day and age, most of us are familiar with the importance of collagen. It's what gives your young skin its full, supple appearance. And when it breaks down, you may begin to see skin laxity and facial wrinkles. When the collagen goes away, it takes facial volume and elasticity with it, leaving you with a face that may look older than how you feel inside.

If you aren't ready to grow old gracefully, treatment with RADIESSE® wrinkle filler can bring back your own natural collagen and restore facial volume, with results that may last a year or more in many patients. To learn how RADIESSE wrinkle filler can address your specific concerns.

**Restylane™**

*Imagine having the beautiful, full lips you have always dreamed of with Restylane™ lip enhancement.*

Restylane™ is safe and effective. Restylane™ restores volume and fullness to the skin to correct moderate to severe wrinkles and folds around the nose and mouth. A crystal-clear, non-animal, biodegradable gel based on a natural substance, called hyaluronic acid. The gel is injected into the skin in tiny amounts with a very fine needle. The result is instantaneous and produces a long-lasting, natural enhancement that is gentle and safe to your skin.

The results are immediate and lasting. Restylane™ treatments last about six months.

**Juvéderm®**

JUVÉDERM® is the smooth gel filler that your doctor uses to instantly smooth away wrinkles around your mouth and nose. With just one treatment, you'll get smooth and natural-looking results that last up to a year.† JUVÉDERM® XC is manufactured using HYLACROSS™ technology, creating a smooth-consistency gel. It is infused with lidocaine to improve comfort during treatment. With JUVÉDERM® XC you get the smooth results you expect, with the improved comfort you want.

**Where does Juvéderm work best?**

Everyone's skin ages differently and JUVÉDERM® XC may be used to rejuvenate multiple problem areas.\* From Restylane™. From smile lines to vertical lip lines, you can smooth away unwanted wrinkles and restore natural contours

Before Your Treatment:

Some doctors recommend that you avoid any medications that can prolong bleeding, such as aspirin and non-steroidal anti-inflammatories (NSAIDs), for at least a week prior to receiving the treatment for wrinkles in order to reduce the risk of bruising and bleeding at the injection site. Ask your healthcare professional what he or she recommends.

Treatments are done at Zeal Med Spa and take approximately 30 minutes. Recovery time is minimal and most clients return to normal activities immediately.

You should avoid the following for at least 24 hours after treatment:

- Strenuous exercise
- Consumption of alcoholic beverages
- Extended exposure to sun or heat

You may experience pain, tenderness, temporary redness, swelling, bruising, firmness, and bumps at the injection sites. Studies have shown that these are usually mild to moderate in nature and clear up on their own in 7 days or less<sup>1</sup>. If you experience swelling at the injection site, you can apply an ice pack for a brief period. Be sure to report any redness and/or visible swelling that last for more than a few days (or any other symptoms that cause you concern) after receiving treatment to your healthcare professional. Your healthcare professional will tell you when makeup may be applied after your wrinkle treatment.

### What to expect from Juvéderm treatment?

You should see an immediate improvement in the treatment areas. Most patients need one injectable dermal filler treatment to achieve optimal wrinkle smoothing and improve skin volume. However, results from injectable dermal fillers may vary and correction is temporary. Supplemental “touch up” treatments may be required to achieve and maintain optimal correction of your wrinkles and folds.

### How Derma Fillers Work
